

A MESSAGE FROM DR BRAUN...

Summer is winding down and the days are slowly getting shorter as the season turns over into fall. One can't help but wish that the longer days of summer, times with good friends, fresh food on patios and BBQ's did not have to end. As we look ahead to fall our social calendars make room for more responsibilities, students head back to school, and work projects once again come to the forefront. In the coming months hopefully everyone can maintain an even balance of work and play while meeting often hectic demands of life. Take good care of yourself!

Until next month... Live life to its fullest!

Martin Braun

PELLEVÉ™

There are many changes that come with aging, but one of the most disappointing signs is wrinkled and saggy skin. Fortunately, today there are newer advanced treatments such as Pellevé™, which can visibly tighten and smooth the face and neck. We have found the specialized radiofrequency energy of the Pellevé™ to be especially beneficial for targeting the skin around the eyes as well as the skin on the neck. The small hand piece allows us to get very close to the eyes and brow bone and the repeated application of continuous energy on the neck can mean a big difference in appearance. Patients can now literally tighten and tone their skin on their lunch break with no downtime or discomfort! Call today for details!

eMATRIX™

Imagine a treatment that can treat fine lines and wrinkles, improve the appearance of acne scars, improve textural irregularities, and tighten skin—all in one sitting. Now, imagine you can achieve all this in a treatment that requires little-to-no downtime and is clinically proven safe for ALL skin types. You too can change your face with Sublative Rejuvenation using the eMatrix™.

DCL SKIN BRIGHTENING

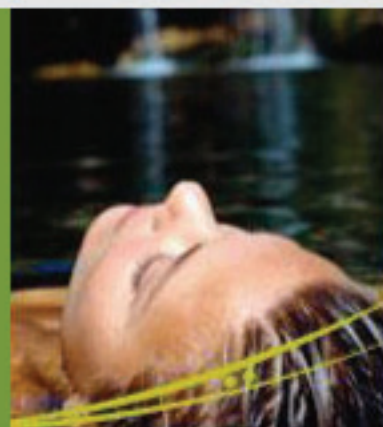

Our staff and many of our patients are excited about the arrival of DCL's new Skin Brightening serum. Clinically proven to reduce the appearance of pigmentation without the use of hydroquinone. This topical serum can be used in combination with clinic treatments for best results. Restore your skin's radiance, diminish the appearance of brown spots and protect against future discoloration. Call and talk to Rhonda about her personal experience.

INTERNET BASED WEIGHT LOSS SYSTEMS SHOW PROMISING RESULTS!

In a recently published study found in the Preventative Medicine Journal, 481 healthy overweight adults were randomized to one of 3 delivery methods of a behavioral weight loss program with weekly meetings: Internet (n = 161), In Person (n = 158), or Hybrid (Internet + In Person, n = 162). The study took place in two centers in Vermont and Arkansas from 2003 to 2008. The results demonstrated that the Internet is a viable alternative to in-person treatment for the delivery and dissemination of a behavioral weight-control intervention.

Whether you're interested in the latest new developments at the clinic, want to keep up with the staff or have questions for Dr. Braun you can find it here!
