

AT LONG LAST,
WE HAVE IT...
for everyone!

coolsculpting 
by ZELTIQ

Men and women seeking the latest and most effective advances in fat reduction and body contouring can now schedule CoolSculpting™ by ZELTIQ at the Vancouver Laser & Skin Care Centre. FDA and Health Canada approved, this non-surgical body contouring procedure uses controlled cooling to target unwanted fat deposits. If your healthy diet and regular exercise haven't been able to help you lose those love handles, CoolSculpting™ may be an excellent way to achieve the toned body you want.

What makes the CoolSculpting procedure different is that it uses advanced cooling technology to selectively target fat bulges and eliminate fat cells through a gradual process that does not harm the surrounding tissues. This procedure can reduce unwanted abdominal fat, love handles (flanks), and back fat. During the treatment, the CoolSculpting™ device is applied to the targeted area to destroy unwanted fat cells. No anesthesia! No incisions!

During the next 2 to 4 months, you will enjoy an increasingly toned and slim body as your body naturally cleanses itself of the treated fat cells.
