

## **Much On Demand**

Vancouver Laser and Skin Care Centre—This centre recently doubled in size to meet demand. Founder Dr. Martin Braun was among the first doctors to bring Levulan Photodynamic Therapy (or PDT) to Canada. The process targets the precancerous skin condition actinic keratoses, but also minimizes pore size, cuts back oiliness and removes fine lines without scarring. He also administers more Botox than anyone in Western Canada. 309-750 W. Broadway, 604-708-9891, [vancouverlaser.com](http://vancouverlaser.com).
