Drs. Martin and Susan Braun run a busy clinic: He injects more Botox than any other doctor in Canada, and she does the same with Restylane. This centre is a good option if you're looking for skin-tightening Thermage or advanced laser treatments to remove tattoos. The Brauns will treat a variety of skin problems, including acne, rosacea, scarring and vein disorders, as well as remove hair. If you're after a sleeker silhouette, mesotherapy's non-invasive microinjections can dissolve fat and minimize the appearance of pesky cellulite.
